## SUMMARY

Senior electrical engineering student with experience in engineering projects and digital 2D/3D modeling. Project experience includes applications of software and hardware. Seeking full-time position Fall 2026 in manufacturing, electrical integration, and other engineering industries.

## EDUCATION

### B.S.E., Electrical Systems Engineer

May 2027

Arizona State University

3.75 GPA

Ira A . Fulton School of Engineering

Relevant Coursework: EGR Electrical Fundamentals, CADD and Solid Modeling, Design of Electrical Systems

## TECHNICAL SKILLS AND CERTIFICATIONS

**Hard Skills:** 3D printing, Soldering, Power tools handling, Circuit modeling, PCB modeling, Engineer drawing sheet designing, 3D modeling

**Design and Modeling Tools:** SOLIDWORKS, Blender, KiCAD, MATLAB, Simulink, Simscape, AutoCAD, LTSpice

**Hardware-Software Integration:** MPLab x IDE, Arduino IDE, VSCode

**Certifications:** MATLAB onramp, Simulink onramp, Simscape onramp, Power Electronics Simulation onramp, Circuit Simulation onramp

## PROJECTS

### EGR 314 Project: PCB Metal Detection System For a Rover; Partial Success

Spring 2026

Collaborated in a team of six to design a features on an exploration rover:

- Developed team schedule, team budget, and team meeting summary reports.
- Designed 3D prints using Solidworks and PCB designs using KiCAD.
- Created both an individual and team report on GitHub repository.
- Project design utilized both ESP32 and PIC18 microcontrollers.

### EGR 202 Project: Clap Light system ; Success

Fall 2025

Worked with team of four to design and develop a custom clap light system:

- Combination of sound toggle system, touchless brightness changer, daylight toggle sensor, connection hub system.
- Coded independent PIC18F47K42 microcontrollers to carry out each of the four systems with various unique sensors and actuators.

### EGR 201 Project: Five Coded Lock Boxes ; Success

Spring 2025

Managed team of four to design encoded boxes that unlock using corresponding passcodes with one keypad:

- Designed 3D printed boxes from Solidworks and attached motors for the box opening mechanism.
- Programmed an Arduino UNO to connect five independent motors to one pin pad.

## PROFESSIONAL EXPERIENCE

### Pizza Hut, Queen Creek, AZ, Shift Manger (30-40 hours/week)

Sep 2022 – now

- Carried out opening and closing procedures while maintaining food quality standards and customer service.
- Oversaw cash handling, inventory stocking, and team coordinating across five different locations.
- Servsafe certified.

### DoorDash, Queen Creek - Tempe, AZ, Delivery Driver (Up to 40 hours/week)

May 2025 – now

- Experienced driver and package handler.
- Self managed and physically adept.

## ACTIVITIES

### Solo Projects

#### Blender Animation:

- 3D modeling, rigging, procedural nodes, texturing

#### 3D printing:

- Printed Benchy from sketchfab
